

# The only managed service that takes complete responsibility for your cybersecurity, and delivers **superior protection** with **complete cost control**

Unlike many so-called managed services, F12 Secure takes full responsibility for your IT security.

Never worry about network breaches, malicious apps, or the errant clicks of your staff:

F12 Secure means your security tech stack is always leading-edge.

Bolster IT protections with best-of-breed security training and compliance and reporting policies.

And enjoy the backing of a security operations center equipped for 24/7 monitoring, immediate incident response and remediation.

All for a flat monthly fee.

Get on with business instead trying to manage cybersecurity. Get F12 Secure.

**Comprehensive cybersecurity**

**SOC 2 Type II and CyberSecure certified provider**

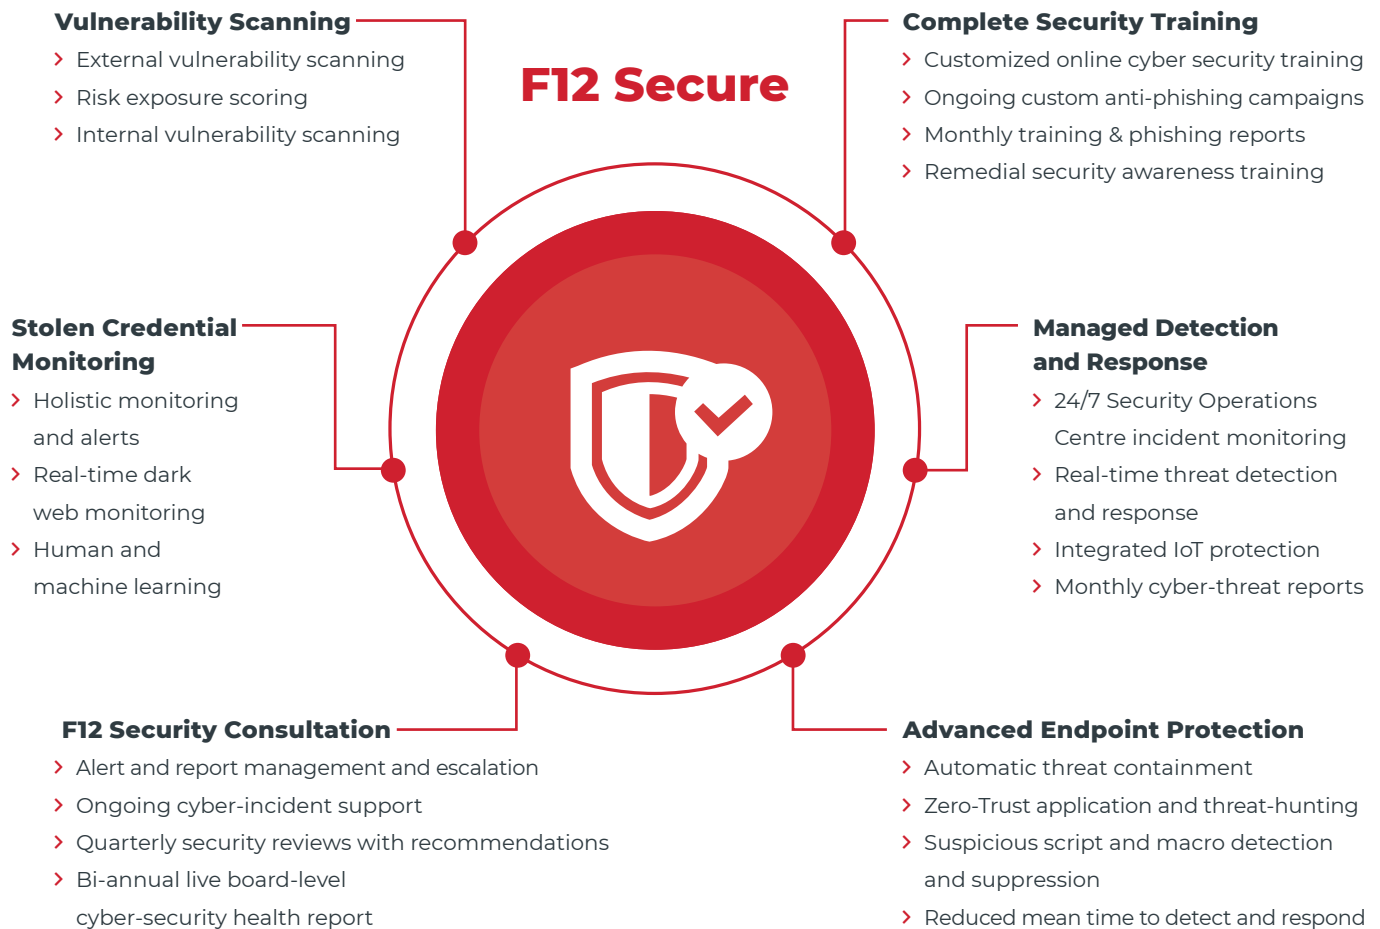

**All for a flat monthly fee**

## **Strong, pro-active cybersecurity**

When reputation is everything, cybersecurity is non-negotiable. That's why we've developed our platform from the ground up based on the NIST Cyber Security Framework and CIS Controls.

F12 is one of a handful of SOC Type II CyberSecure Canada-certified IT providers. We use auditable data governance policies so you can prove that your procedures are compliant and that client data is controlled and protected to the necessary standards.

# The strongest end-to-end cybersecurity

## Additional options

- > Penetration testing
- > Red Team exercises

## Fulfillment

All security assessments, deployment, and quarterly reporting is performed by an accredited F12 Security Expert from our Security and Compliance team.

## About F12

F12 has been creating streamlined technology solutions for more than 20 years. F12 aims to eliminate the IT treadmill of forced obsolesce and never-ending project billing with an adaptable IT platform at a predictable per-user price.
